MEMORANDUM FOR: THE RECORD

SUBJECT: Authorization for Payment of Certain Expenses Under
Project MKULTRA, Subproject 23

1. In order to carry on the work of the above Subproject, it was necessary to test the effects of certain chemical substances when administered to human beings. Certain of the anticipated effects involved mental functions which precluded the use of mental defectives for this particular study.
2. In view of these circumstances the project engineer, with verbal approval from his chief, authorized the contractor to pay the hospitals expenses of certain persons suffering from incurable cancer for the privilege of studying the effects of these chemicals during their terminal illnesses. The total funds expended in this fashion amounted to \$658.05 and full value was received.
3. It is requested that the Chief, TSS indicate his knowledge and approval of this particular expenditure for audit purposes.

MEMORANDUM FOR THE RECORD

SUBJECT: Cash Payments to Dr. [REDACTED]

1. The original contracts with Dr. [REDACTED] specified that he was authorized to draw consultants' fees and expenses for the time that he personally spent performing duties of a consulting nature for TSS/CD on official business not covered by the proposals upon which the contract was based.

2. It was thought at that time that such compensation could be made by authorizing Dr. [REDACTED] to draw checks in his own favor against the Special Bank Accounts set up by the Agency in the name of the [REDACTED]. When this was attempted it turned out that no satisfactory accounting for such funds could be made. In order to account for this income to the Internal Revenue auditors, in his personal tax return, Dr. [REDACTED] had to report that he had earned the fee performing consultations with an "anonymous person" since the Agency contributions had been so designated on the books of the Fund. In addition, there appeared to be no way in which the Fund's own auditors could be satisfied with such transfers from the Fund's accounts to Dr. [REDACTED]. As a result of these problems, [REDACTED] was not paid in any way for the time that he spent performing TSS/CD business during the years 1952 and 1953. This time amounted to 30 days over the period of two years.

3. When MKULTRA funds became available to TSS/CD it was decided that Dr. [REDACTED] could be paid this time without any security problems arising in connection with the transfer of funds. He was paid \$1,500.00 in cash on an invoice against his present MKULTRA project with the stipulation that he would distribute the money in his private accounts as medical consulting fees for income tax purposes. Since the total proposed amount of the Fund's MKULTRA grant never actually appears in the books of the Fund as such, there will never be any question about this for the Fund's own auditors.

4. In the future all such payments to Dr. [REDACTED] personally will be made in this way.

SUBJECT: Increase in the Scope of Subproject 23, Project MKULTRA

(C)
1. Due to a considerable increase in the scope of the work undertaken by [REDACTED] at the direction of TSS/CD under Subproject 23, Project MKULTRA, the \$42,700.00 sum originally obligated for this work is insufficient to cover the year's costs. It is therefore proposed to add \$15,000.00 to that already obligated under this Subproject.

2. The total cost of this Subproject for the period 28 January 1954 to 28 January 1955 will thus amount to \$57,700.00.

3. The increase in scope responsible for this proposal consists of the development and partial financing of two new sources of biologically active compounds of interest in the program TSS/CD is carrying out.

The present investigation is concerned with chemical agents which are effective in modifying the behavior and function of the central nervous system.

- 1 - It is proposed to study a variety of known drugs in this pharmacological class that are in present day use and to synthesize new chemical agents or to modify existing ones as occasion may demand.
- 2 - The various chemical agents investigated or synthesized will be tested on animals to determine their acute and chronic toxicity. Their pharmacological effects will be studied by a variety of assay techniques, such as blood pressure determinations, bronchial dilatation recordings, endocrine effects, etc. Complete animal facilities will be maintained for this purpose and pathologic study will be carried out on the affected organs when the animals are sacrificed.
- 3 - Preliminary clinical investigation will be carried out on the more promising chemical agents, and appropriate laboratory procedures will be performed, such as blood counts, urinalysis, etc. to determine the effectiveness and the side reactions of the drugs under investigation.
